AMENDED CLAIMS

- 1-10. (previously cancelled)
11. (currently cancelled)
12-20. (withdrawn from consideration)
21. (new) A method of operating a printing unit in an offset machine, which includes a cylinder and an inking unit which is movable to engage and disengage said cylinder, comprising the steps of:
 providing a doctor blade chamber device for alternately applying lacquer and alternately applying water;
 disengaging the inking unit from contact with said cylinder when said doctor blade chamber device is applying lacquer; and
 engaging the inking unit to be in contact with said cylinder when said doctor blade chamber device is applying water.
22. (new) A method of operating a printing unit in an offset machine which includes a cylinder and an inking unit which is movable to engage and disengage said cylinder, comprising the steps of:
 providing a first doctor blade chamber device for applying lacquer;
 providing a second doctor blade chamber device for applying water;
 disengaging the inking unit from contact with said cylinder when said first doctor blade chamber device is applying lacquer; and
 engaging the inking unit to be in contact with said cylinder when said second doctor blade chamber device is applying water.
